10/1 – Lucky Book orders due

Remember to read for **20** minutes every night!

Please clean out your take home folder every night!

Graded papers may stay at home!

### NASA

Today we spoke to a real-life NASA engineer, via the internet. We were able to ask him questions and he showed us many models and pictures based on our inquires!

### Salt Dough Maps

We have a project for Social Studies coming up using salt dough that will be brought from home. The recipe will come home soon in your child's folder. We will also need **green, yellow, brown and blue** tempura paint, if you have any, to complete these fun projects.

### Grading Policy

Any student is allowed to make corrections and resubmit an assignment if the original grade is less than 70. I will average the original grade with the "corrected" grade for the "new" grade. We have discussed this in class and the students know, in order for me to recheck it, I must be able to see their original work and their corrections must be made in colored pencil or red pen. Corrected work must be returned to me within one week of being handed back.
